The newest of the Town Gully Tracks is nearing completion soon!

A fantastic recreational shared path has been constructed linking Arrowsmith Avenue (near the SH5 end, just after the Harvey street turnoff) with the bottom end of Harvey Street, which is first left from the start of Shepherd Road.

The track has been built above the storm water run-off, so even after last weekends heavy rain, it was perfectly dry. Feeder routes (steps) into the gully are also linking Shepherd Road with Harvey Street and further up, Fairview Tce.
