Thanks to the guys and girls at Ground Effect we have been given \$1,000 from the slush fund to finish off the zig-zag-zig plus another zag coming out of Te Totara gully up to the road.

It

We have a lot of summer maintenance jobs on the go now with re-alignments on the Rotary Ride. Most of these are to reduce wear and tear on the track, and make it more interesting to ride. We will be doing a big job at the Huka falls end.

Seeing a lot of traffic on the Rotary Ride after work, so watch out for other riders remember its two way. For those new to the tracks please yell out the number of riders in your group when meeting others, and downhill gives way to uphill

Cheers

Pete. M
